II Movement Ecology Brazil Meeting

01
julho/19

Conferências

 Ph.D. Luca Börger
Swansea University

 Ph.D. Juan Morales
Universidad Nacional
del Comahue

 Ph.D. James Forester
University of Minnesota

08:00	09:00	Animal Movement in Dynamics in a Changing World	Luca Borger
09:00	10:00	Individuals, Populations, and Communities: Linking Animal Movement to Ecological Processes	Juan Morales
10:00	10:30	Apresentação de pôster e coffee break	
10:30	10:45	Effects of resource distribution in the evolution of animal territory	Jorge F. S. Menezes
10:45	11:00	Dispersal and persistence in heterogeneous landscapes: consequences of different population mechanisms and habitat selection	Erika Garcez
11:00	11:15	Moving from species-level to community-level analyses in Movement Ecology	Danielle Leal Ramos
11:15	11:30	Applied movement ecology: from individual movement to conservation and restoration of ecosystems	Bernardo B. N. dos Santos
11:30	13:00	Almoço	
13:00	14:00	Do electric moose dream of drones? Opportunities and challenges of emerging technologies in wildlife research	James Forester
14:00	14:15	Landscape use by giant anteater (<i>Myrmecophaga tridactyla</i>) by satellite monitoring in Estação ecológica de Santa Barbara, São Paulo State, Brasil	Alessandra Bertassoni
14:15	14:30	Spatial use and conservation of griffon vulture in Iberian Peninsula	Eneko Arrondo
14:30	14:45	Impact of feral goats on insular Mediterranean vegetation	Miguel Ibáñez Álvarez
14:45	15:00	Habitat selection of capybaras in contrasting landscapes	Thiago da Costa Dias
15:00	15:30	Apresentação de pôster e coffee break	
15:30	15:45	Effects of air temperature on habitat selection and activity patterns of two tropical imperfect homeotherms	Nina Attias
15:45	16:00	Mixed structural resource selection function (mixed-SRSF) for assessing the contribution of different	Zaida Ortega Diago
16:00	16:15	Liking physiology and movement to understand how forest loss affect the energetic costs of animal thermoregulation	Aline Giroux
16:15	16:30	How do jaguars move through the landscape? Integrated Step Selection and Movement Analyses applied to jaguar ecology and conservation	Alan Eduardo de Barros
